Clean and Inspect Machinery Hygiene Course

Protect Your Interests

The Clean and Inspect Machinery Hygiene Course is designed to provide you with an awareness of biosecurity threats associated with the movement of machinery, vehicles and equipment. The course shows you how to identify some of the key biosecurity threats facing your operations and equips supervisors, employees and contractors with the skills and knowledge to implement company specific hygiene policies and procedures.

Nationally Accredited Course

This is a nationally accredited course, through Millettia Solutions Pty Ltd T/A Prosaw Australia ABN 54166103457 (Registered Training Organisation number 45172), TH9 Outdoor Services acting as co provider for this course. The course covers one unit of competency under the Conservation and Land Management Certificate II stream (AHC BIO203 - inspect and clean machinery tools and equipment to preserve biosecurity).

Get the Skills and Knowledge You Need

The key components of learning include:

- Company specific biosecurity procedures (if in place)
- State government legislation
- Biosecurity identification skills, covering locally relevant species
- Biosecurity Risk Material
- Potential contamination points on vehicles, machinery and equipment
- Inspection and clean down procedures
- Safety procedures
- Equipment that can assist with inspection and cleaning
- Practical clean down and inspection activities.

Outdoor Services

Recognised Certification

When you complete the Clean and Inspect Machinery Hygiene Course, you'll receive a Statement of Attainment. You'll then be able to clean and inspect vehicle and equipment hygiene and sign-off on hygiene inspection forms as relevant to your enterprise.

Practical One-Day Course Provided at Your Preferred Location

The full day course covers all of the theory and practical components required to receive your competency. Courses can be provided at your work site and the training date and timings can be fully tailored to your needs.

What to Bring:

- Long sleeve shirt and long pants
- Safety boots (suitable for getting wet/dirty)
- Water bottle
- Safety glasses and sunglasses
- Hat and sunscreen
- Gloves
- Writing materials
- PPE as specified by your company procedures

Your Trainer

Belinda Callanan is the Senior Trainer at TH9 Outdoor Services. As an experienced pest and land management specialist, Belinda delivers practical biosecurity and land management solutions for a range of organisations including government departments, energy and gas companies and private landholders. Belinda has assisted hundreds of organisations to protect their interests by providing training and advice on proper decontamination and inspection methods for machinery, equipment and vehicle movements.
